

MARC JOSEPH G. BALCITA

Network and Infrastructure Engineer | NOC Operations | CCNA Certified

Pateros, Metro Manila, Philippines | +63 918 266 1465 | mjbalcitaa@gmail.com | LinkedIn | marcbalcita.vercel.app

PROFESSIONAL SUMMARY

CCNA-certified Network and Infrastructure Engineer with 3+ years of hands-on experience in fiber backbone deployment, data center buildouts, structured cabling, enterprise network operations, and NOC support. Delivered end-to-end network and physical infrastructure across 9+ enterprise sites in banking, healthcare, telecom, FMCG, and data center sectors across Luzon, Visayas, and Mindanao. Skilled in OTDR and Fluke testing, VLAN configuration, OSPF/EIGRP routing, Palo Alto firewall, GlobalProtect VPN, AudioCodes SBC, and SLA-aligned incident escalation. Experienced in Microsoft Azure administration, Intune MDM, and endpoint security operations.

CORE TECHNICAL SKILLS

Networking & Protocols	LAN/WAN, VLANs, 802.1Q Trunking, Inter-VLAN Routing, Subnetting (VLSM), DHCP, DNS, NAT, ACLs, OSPF, EIGRP, BGP Awareness, MPLS Awareness, STP/RSTP/MSTP, IDS/IPS, Port Security, TCP/IP
Security & VPN	Palo Alto Firewall, GlobalProtect VPN (deploy, configure, validate, troubleshoot), IDS/IPS Threat Prevention, Firewall Policy Configuration, ACL Enforcement, Network Segmentation, Kali Linux, Wireshark
Cloud & Identity	Microsoft Azure Portal, Intune MDM, Microsoft 365, Active Directory, Group Policy, Exchange, Azure AD, Sophos Endpoint, Microsoft Defender (MDE)
Enterprise Platforms	Cisco IOS/Catalyst, Cisco Meraki, Juniper, Nokia, Palo Alto, AudioCodes SBC, Cisco CUCM (Lab/Training), PABX, Wireless Networking (Cisco/Juniper/Meraki APs)
Physical Infrastructure	Fiber Backbone Termination, Fusion Splicing, ODF/FDB, Splice Trays, OTDR (SM/MM), Fluke Copper/Fiber, Anritsu MT9083, Link Ware, Structured Cabling, NAP Testing, Rack Buildout, Patch Panels, Airflow Management
Systems & Tools	RHEL Linux, Windows 10/11, Windows Server, VMware, Hyper-V, Wireshark, SecureCRT, PuTTY, Shell Scripting, Postman, MariaDB, Apache
Monitoring & ITSM	Uptime Kuma, Zabbix, Alert Dashboard Management, ServiceNow, Spiceworks, Zmny/OTRS, ITIL-Aligned Incident & Change Management, RFC/MOP Creation, SLA Adherence
Documentation	As-Built Plans, BOQ, OTDR/Fluke Test Reports, Network Topology Diagrams, MOP/RFC, SOPs, Runbooks, Incident Post-Mortems, Configuration Records
Web Development	Angular 21, TypeScript, RxJS, React 19, HTML5/CSS3, Node.js, Netlify Functions, Firebase, Git, GitHub, Netlify, Vercel

PROFESSIONAL EXPERIENCE

BALCITA Fiber Optic Installation Services	January 2023 – Present
---	------------------------

Network and Infrastructure Engineer

SubcontractorTechConnect I.T. Solutions | Field and Site Deployment

Sectors: Banking, Data Center (DR/BC), Healthcare, FMCG, Telecommunications, Integrated Resort & Casino, National Water Utility, Managed IT ServicesLuzon, Visayas, and Mindanao

- Planned and executed physical-layer installation of fiber backbone cabling across 9+ enterprise sites including fusion splicing, ODF/FDB termination, splice tray organization, and rack-mounted enclosure labeling per cabling matrices.
- Performed OTDR (SM/MM), Fluke copper/fiber, Anritsu MT9083, and Link Ware acceptance testing, producing commissioning reports, test result documentation, and client sign-off records for each implementation.
- Led full data center rack buildouts including server racks, patch panels, switches, firewalls, and fiber distribution frames, enforcing airflow management, bend-radius compliance, and structured labeling standards.
- Supported Equinix MN1/MN2 NIR Backbone site assessment (August 2025), coordinating with on-site technicians, validating cabling infrastructure, and submitting site access requests and vendor remote hands documentation.
- Commissioned 100+ endpoints per engagement including Wi-Fi APs, IP cameras, IP phones, and network devices across Cisco, Juniper, Meraki, Palo Alto, and Nokia environments, configuring Cisco switches and routers for VLAN mapping and connectivity.
- Deployed and configured GlobalProtect VPN on Palo Alto platforms including gateway and portal setup, user access policy configuration, end-user validation, and troubleshooting for secure remote access.
- Implemented Palo Alto firewall security controls including IDS/IPS threat prevention profiles, security policy configuration, and ACL enforcement across enterprise perimeter and data center deployments.
- Deployed and troubleshot AudioCodes SBC hardware in enterprise voice environments and handled PABX call tracing to isolate voice and connectivity issues for enterprise clients.
- Executed NIR backbone implementation and WLAN deployment projects, performing network design, equipment installation, AP configuration, and full connectivity validation across multi-site environments.
- Provided Tier 1 NOC monitoring in a 24/7 operations environment, performing incident triage, DHCP and AP troubleshooting, and SLA-aligned escalation with complete findings and logs.
- Prepared as-built plans, BOQs, OTDR/Fluke test reports, and progress documentation for PLDT Metro Manila Operations and other enterprise clients.
- Coordinated and supervised local field technicians and vendor teams during site ocular inspections, validating project scope, materials, and implementation requirements prior to execution.

Fujitsu Philippines Inc.

November 2023 – April 2024

IT Infrastructure and Systems Support Intern

Digital Systems Platform Unit (DSPU) | University OJTconcurrent with ongoing field work

- Provided Level 1/2 end-user desktop support across Windows and Microsoft 365 environments for users in APAC, UK, and US time zones, resolving hardware, software, connectivity, and Exchange email issues via TeamViewer and AnyDesk.
- Administered Microsoft Azure Portal, Intune MDM (device enrollment, policy deployment, compliance), Active Directory (user management, password resets), and Group Policy as part of daily infrastructure support workflows.
- Executed software and OS patching, version upgrades, and hardware installation; troubleshot workstations, Windows kiosks, AV systems (Poly/VC), and network printers including print server paths and GPO configuration.
- Monitored network gateways and infrastructure availability using Uptime Kuma; logged all incidents and changes in ServiceNow and Spiceworks under ITIL-aligned processes with SLA-compliant response times and complete audit records.
- Supported endpoint security operations using Sophos Endpoint and Microsoft Defender, assisting in threat detection, remediation, and user notification workflows across multiple locations.
- Accessed routers, switches, and servers via SecureCRT and PuTTY for remote diagnostics; coordinated with third-party vendors for warranty service and hardware support.

WEB DEVELOPMENT PROJECTS

BALCITA Fiber OpticsCompany Website

Angular 21, TypeScript 5.9, RxJS, Node.js, Netlify Functions, Nodemailer, GitHub CI/CD | [balcita-fiberoptics.netlify.app](#)

- Designed and built an 8-page company SPA from scratch using Angular 21 Standalone Components, TypeScript 5.9, and RxJS; implemented 3D CSS animations, inline SVG icons, and a mobile-first responsive layout.
- Built a serverless backend with Node.js and Netlify Functions: Nodemailer for transactional email, Netlify Forms for submission handling; deployed on Netlify with GitHub CI/CD, Vitest unit tests, and Prettier formatting.

Personal Portfolio Website

2025 – Present

React 19, Vite 8, EmailJS, CSS Animations | [marcbalcita.vercel.app](#)

- Built a single-page portfolio from scratch with no UI library; implemented custom IntersectionObserver hooks for scroll-triggered animations, typewriter effect, animated stat counters, image lightbox with keyboard support, and EmailJS dual-send contact form (notification + auto-reply).

EDUCATION

Lyceum of the Philippines University

September 2020 – September 2024

Bachelor of Science in Information Technology (Information Security)

Intramuros, Metro Manila, Philippines | Dean's List, 1st to 4th Year (2020–2024)

- Thesis: ReceiptCo Mobile AppBest Research in Science and Technology, LPU 18th Annual Best Student Research Forum (March 2025)
- Accepted for Oral Presentation, Asian Graduate Studies Summit 2025 (A-GRASS), Ho Chi Minh City, Vietnam (May 2025)
- Relevant coursework: Network fundamentals and topology design (Cisco Packet Tracer), System and security fundamentals (Kali Linux), Programming in C, C++, Java, and Python

Rivan IT / RivanCyber Training Institute

September 2025

Network Engineer TraineeCCNA Bootcamp (Hands-On Lab Training)

- Designed, configured, and troubleshoot enterprise LAN/WAN topologies using Cisco routers and switches.
- Implemented VLANs, 802.1Q trunking, inter-VLAN routing, STP fundamentals, OSPF, and EIGRP.
- Applied security fundamentals including port security, ACL configuration, and network segmentation.
- Worked with CUCM fundamentals, IP phones, voice VLANs, and basic call-flow validation.

PROFESSIONAL DEVELOPMENT

- **Ruijie | Cybrey WorkshopNGFW & AI-Oriented SME Networking** | VST-ECS / Ruijie Networks Philippines | May 6, 2026
Covered CF Series NGFW (WAF, IPS, AV, AI Behavioral Intelligence, SSL decryption), dual-source threat intelligence (Google + Kaspersky), Cybrey AI-oriented SME product line (CR Gateway, CNC Controller, CS Switch, CAP Wi-Fi 6/7), and SI/MSP cloud-managed deployment scenarios.
